About The
ColorFast Plus Pigment System

Color plays an integral role in how we react and feel. Objects send messages to our brain with the use of color. Whether it is green grass, a blue sky, or a yellow school bus, color evokes an emotional reaction. Putting color on building facades is no different.

Parex USA now offers a proprietary new pigment system that will revolutionize the way we see and use color. The new high-end color system increases the range of color options, creating a broader spectrum of more vibrant, brilliant colors. To avoid unsightly fading issues, the advanced technology of the ColorFast Plus Pigment System incorporates an inorganic blend of high quality pigments. Discerning architects, builders and owners can now specify vivid colors with superior fade resistance for their premier structures.

Contact
For more information on the ColorFast Plus Pigment System, please contact our Color and Sample Department at (866) 516-0061 x 1985 or our Technical Department at (800) 226-2424. You can also email us at color.samples@parexusa.com.

ColorFast Pigments Offer:
- Longer lasting color - UV resistance
- Bolder, richer color spectrum
- Improved opacity
- Fade warranty
- Increased water resistivity
- No VOC
The Parex ColorFast Pigment System provides superior fade resistance, broader color space spectrum, enhanced opacity, increased water resistivity, and improved tack for less dirt pick-up.

Vibrant Spectrum
The new ColorFast Plus System integrates multiple unique pigments, for higher performance, offering a broader range of brighter colors with superior durability, increased fade resistance and improved opacity. From a deep, rich red to a warm, neutral beige, we have the entire color spectrum covered. Custom color matching also available.

Environmentally Conscious
ColorFast pigments are specially formulated with the environment in mind. All ColorFast pigments are VOC and APEO-Free.

Warranty
Parex USA, Inc. will warrant that the color will be fade resistant when the ColorFast Plus System is used with a Parex USA finish or coating. If there is a valid claim against the product then the manufacturer will supply material and labor to have the structure coated with a Parex USA product. See actual warranty for details.

All ColorFast Plus finishes and coatings must be factory tinted. Contact your Parex USA sales representative for more information and specific details on the warranty program. All warranties must be approved prior to the product being tinted. Submit requests to technicalservice@parexusa.com prior to ordering product.

Color is one of the most important elements that define architectural design.

High Performance
When the need for enhanced fade resistance and long-term durability is required, look to the Parex USA ColorFast Plus System. With better color retention, maintenance costs are reduced due to decreased repainting schedules. The technology behind the ColorFast Plus System allows architects to specify virtually any vibrant color without worrying about fading or long-term maintenance.

More than 45.0% difference in fade resistance after 5,000 hours of QUV exposure

The ColorFast Pigment System provides superior fade resistance, broader color space spectrum, enhanced opacity, increased water resistivity, and improved tack for less dirt pick-up.
