Stucco Pro
Stucco Grade Acrylic Finish

DESCRIPTION:
- 100% acrylic-based textured finish.
- Dirt Pick-up Resistance (DPR): The surface of the finish hardens and does not soften again under heat. The non-tacky surface provides high resistance to accumulation of dirt, mold, and pollutants.

USES:
- Exterior finish coat over:
  - Properly prepared stucco, masonry and concrete surfaces.

COMPOSITION:
- 100% acrylic polymer.
- Aggregate: Pure crushed marble, rust-free.
- Pigment base: Titanium dioxide.
- Colors: Parex USA standard colors or tinted to desired custom color.

CONTAINER:
- 65 lbs. (29.5 kg) net weight in plastic pails.
- Storage: Protect from direct sunlight and freezing at all times.
- Do not stack pails more than 3 pails high
- Shelf Life: Reference Parex USA Expiration Date of Products Technical Bulletin.
MIXING:
- Use clean equipment for mixing and preparation.
- Stir to obtain a homogeneous consistency using a heavy-duty 1/2-in. (13mm) drill with a rust free paddle at 400-500 rpm. Avoid air entrainment.
- Add liquid color to the pail of finish. Make sure all of the color is added by rinsing out the color vial with water (1/3 of the vial's volume) into the pail.
- Add the amount of water needed (up to a maximum of 16 oz. per pail) to achieve finish texture. To avoid color variations, add the same amount of water to each pail of finish.

APPLICATION:
- Read the entire label before using this product.
- Always maintain a wet edge and work to corners or joints. For best color consistency, use finish with the same batch number within a wall section. For more information, see Technical Bulletin: “Boxing Acrylic Finishes”.
- Keep container closed when not in use.
- Use a clean stainless steel trowel and apply a uniform coat the size of the largest aggregate and apply a uniform coat the thickness of the largest aggregate size of the finish.
- Texturing Parex Stucco Pro Fine, Swirl and Coarse Finishes: Use a clean plastic float or a stainless steel trowel. A plastic float will roll the large aggregates more than a steel trowel. A plastic float or steel trowel while swirling. Continuously dry clean the stainless steel trowel and may cause entrainment.
- Texturing Smooth Finish:
  - Optional: Level stucco brown coats with Stucco Level Coat and let dry prior to finish application.
  - Smooth Finish cannot generally be floated. Texture will be “as trowelled.”
  - Smooth Finish can be trowelled smooth to simulate the texture of limestone.

- For smoothest application, apply in two tight coats. Allow first coat to dry enough that it will not be disturbed during application of the second coat. When second coat is partially dry, trowel to desired smoothness. Light, consistent misting with water during smoothing will increase smoothness. Variations in color tint and smoothness should be expected.
- Spray application: To achieve consistent texture, spray application must use consistent motion, pressure, distance and spray angle. A job-site mock-up for spray application is advised.

LIMITATIONS:
- Ambient and surface temperature must be 40°F (4°C) or higher during application and drying time. Supplemental heat and protection from precipitation must be provided as needed.
- Use only on surfaces that are sound, clean, dry and free from any residue that might affect the ability of the finish to bond to the surface.
- Application in direct sunlight in hot weather may adversely affect aesthetics.
- Not for use with EIFS.
- Parex USA is not responsible for color correctness after finish has been applied.

WARNING:
- Read complete Warning information printed on product container prior to use. For medical emergency information, call 1-800-424-9300.
- For more information on handling this product refer to its Safety Data Sheet (SDS). The most current SDS and Product Data Sheet (PDS) can be found on our website.
- This Product Data Sheet has been prepared in good faith on the basis of information available at the time of publication. It is intended to provide users with information about the guidelines for the proper use and application of the covered product(s) under normal environmental and working conditions. Because each project is different, Parex USA, Inc. cannot be responsible for the consequences of variations in such conditions, or for unforeseen conditions.
