Elastomeric Finishes

**DESCRIPTION:**
- 100% Acrylic-based elastomeric textured finish.
- DPR (Dirt Pick-up Resistance) chemistry.
- Twice the elongation
- Highly flexible: Can bridge pre-existing or existing hairline cracks.
- Integrally colored with high quality pigments.

**USES:**
Finishing coat for:
- Parex EIFS, Fiber-47 Armourwall Scratch & Brown, 202 Armourwall Stucco Base Sanded and 210 Armourwall Stucco Base Concentrate
- New or existing stucco and concrete surfaces.
- Renovation of old stucco and concrete walls.
- Finishing of masonry walls in combination with any Parex 121 Coat & Adhesive as leveler

**COMPOSITION:**
- Binder base: 100% Acrylic polymer with surface-hardening property.
- Aggregate: Pure crushed marble, rust-free.
- Water based: VOC-Compliant
- Pigment base: Titanium dioxide.
- Color: Parex standard colors or tinted to desired custom color.

**e-lastic™ Technology**

*e-lastic™ Technology*, Parex’s exclusive elastomeric polymer formulation, gives Parex Elastomeric Finishes the high flexibility of traditional elastomerics while adding the benefits of durability and dirt pick-up resistance normally found only in traditional acrylic finishes.

*e-lastic™* finishes hide the existing hairline cracks that can appear in stucco bases as they cure, giving an attractive and durable finish to the job.

*e-lastic™* finishes have a harder surface than traditional elastomerics, giving better resistance to airborne dirt and pollutants. This harder surface means that *e-lastic™* finishes stay new-looking longer than elastomerics that use old technology.

*e-lastic™* Technology - found only in Parex Elastomeric Finishes.
aggregate size of the finish.

Texturing: use a clean plastic float or stainless steel trowel, wipe frequently. Apply moderate pressure with consistent motion, rolling the large aggregates to obtain the desired texture.

LIMITATIONS:

- Ambient and surface temperature must be 40°F (4°C) or above during application and drying time. Supplemental heat and protection from precipitation must be provided as needed.
- Use only on surfaces that are sound, clean, unpainted and free from any residue which may affect the ability of the finish to bond to the surface.
- Application in direct sunlight in hot weather may adversely affect aesthetics.
- Due to the composition of this product, minor pin holes may be noticeable in the cured finish.

WARNING:

- Read complete Warning information printed on product container prior to use. For medical emergency information, call 1-800-424-9300.
- For more information on handling this product refer to its Material Safety Data Sheet (MSDS). The most current MSDS and Product Data Sheet (PDS) can be found on our website.
- This Product Data Sheet has been prepared in good faith on the basis of information available at the time of publication. It is intended to provide users with information about the guidelines for the proper use and application of the covered product(s) under normal environmental and working conditions. Because each project is different, Parex USA, Inc. cannot be responsible for the consequences of variations in such conditions, or for unforeseen conditions.
