## 121XL

**Base Coat & Adhesive**

**PAREX®**

**Benefits of 121XL**

- Reduces application time
- Requires less effort and is easier to use than standard base coats
- Applied without the addition of cement

**121XL Base Coat & Adhesive**

Parex 121XL was developed with an emphasis on ease-of-use.

On the job site, 121XL requires only the addition of water.

Once mixed, 121XL's improved workability allows the applicator more time to embed the mesh and achieve a professional look.

The Creamy texture of 121XL is easy to work and cures to a smooth finish.

**Parex applicators requested an easy-to-use product with more open time that would allow them to do a better job.**

**We listened: 121XL**
