

Rio Rancho City Hall – Rio Rancho, NM

ProjectProfile

"We have great confidence in ParexLahabra. Their products perform great if not better than other Manufacturers."

Size: 26,460 sq. ft.

Distributor: L&P Building Supply

Applicator: Les File Drywall

Les File Drywall is an institutional name in the New Mexico building industry. A family oriented company Les File takes pride in its history of beginning in 1955 to growing into a 30 million dollar a year company with 450 employees.

Turning to their trusted local distributor, L&P Building Supply, Les File Drywall chose a combination of El Rey and Parex products to complete the Rio Rancho City Hall Project.

Luckily for Les File Drywall this project faced no challenges and was completed under perfect weather conditions.

"We have great confidence in ParexLahabra, said Transito Rael, Project Manager at Les File Drywall. Their products perform great if not better than other manufacturers."

Les File Drywall has built a reputation in creating beautiful finishes on some of New Mexico's most renowned structures. "By using your product we have become more competitive in the bid market. Transito continued. The help we received from the El Rey team gave us an opportunity to help the owner of the Rio Rancho City Hall building match the color and texture with the Star Event Center located near by."

When asked if they would use El Rey and Parex products again Transito responded, "Yes, they have great products and great service!"

The Challenge

- None

The Solution

- El Rey Fiber 47
- El Rey Permaflex TC
- Parex 310

El Rey
Stucco
